## MV Salvager - dive support vessel

MV Salvager, our dive support vessel, coded up to 60nm offshore, full welfare facilities onboard. Plug and play, quick to mobilise and easy to manoeuvre with twin 6 cylinder diesel onboard engines.

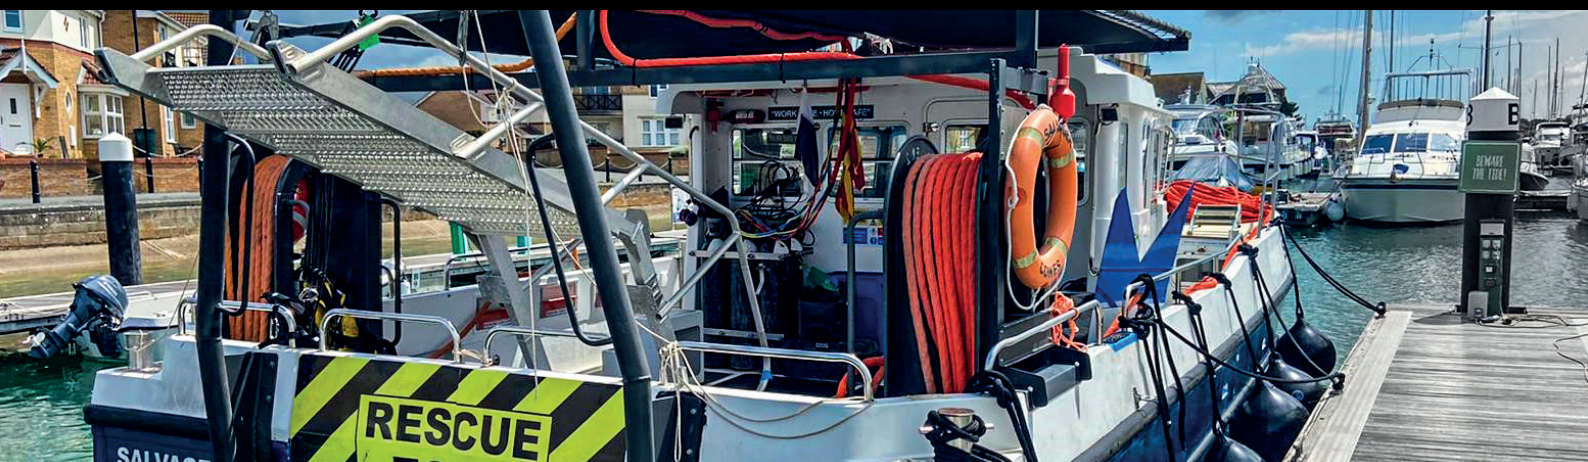

Our vessels are all fully serviced and regulated with planned maintenance via our integrated management system. Our plant and equipment including our dive systems onboard are stripped/serviced and packed with an inventory ready for each and every job.

Our skippers are all competent and qualified as Yacht master offshore with a commercial endorsement up-to 200 gross Tonnes.

A fully compliant tidy dive spread with purpose-built dive ladder, unconscious casualty recovery "A" frame, standby diver seats within a tidy umbilical rack, complete with everything needed to undertake a dive job, from helmets, compressor, de-fib, trauma medical kit, O2, spill kits, underwater camera and lighting units and a spares box to cover every possible eventuality.

Everything listed below has a home within the spread and it can be locked and left safely onsite.

Umbilical's are connected and wrapped on purpose built racking for ease when tendering rather than spread over the deck. HP onboard diesel breathing compressor with x6 36 litre 300 Bar gas supply.
